

Lattelecom BPO and Airpas Aviation AG partnership signing ceremony

Wednesday, May 06, 2009 saw the formalization of an important partnership between two well-established companies with the signing of the Latvian Lattelecom BPO and German Airpas Aviation AG partnership agreement.

At the official signing ceremony, Airpas Aviation AG CEO Reinhold Renger said that the company is planning to broaden its scope of activity in Eastern Europe, Russia and CIS and is grateful for the support from its new local business partner Lattelecom BPO. "The new partnership gives a significant opportunity for Airpas Aviation to promote its corporate presence and to enhance its reputation as a leading software provider for the aviation industry to the region", Renger said.

Ms. Ilze Zoltnere, CEO of Lattelecom BPO, expressed her content over the tie-up and said that Lattelecom BPO in partnership with Airpas Aviation is providing to airlines an efficient cost control and invoice management solution. "We are looking forward to a mutual and beneficial partnership, entering new markets in all of Europe, Russia and CIS", affirms Zoltnere.

Conjointly, Lattelecom BPO and Airpas Aviation AG have successfully implemented their first project of "Paperless invoice processing and cost control solution for airlines" at Latvian airBaltic.

Lattelecom BPO offers outsourced business process services. Business process services enables clients to streamline customer and supplier relationship processes by making more efficient traditional channels and moving traditional conversations like phone, fax, e-mail, post into seamless electronic integration.

Airpas Aviation AG is a well established software provider and consultancy company for the international aviation industry. Known for its unique route profitability and cost management software solution, airpas, the company keeps up with times and develops future programs. The latest cutting-edge software solution eMission supports the EU-ETS requirements imposed on airlines and will allow them to comply easily and beneficially with the EU rules & requirements (MRV & EUA).
